COMPANY PROFILE

2026

INTRODUCING YOU TO NARDAL SAFETY

From trusted and recognized brands, NARDAL SAFETY provides a **single-source solution** for OHSE equipment and instruments.

NARDAL SAFETY is a member of the PROSAFE Group family, which has been **providing and distributing** industrial safety equipment for now **30 years**.

Since 1995, the Group has become one of the largest providers in the region.

Through our international network of suppliers and industry collaborators, we constantly keep ourselves updated on the various new approaches to risk assessments, the **highest international standards** and the relevant strategies deployed in the workplace to address the identified risks.

To keep our promise of making workplaces safer, we continuously improve our team's professionalism to a very high standard at NARDAL SAFETY.

Finally, we consider our customers as partners and are committed to **offering professional advice and sharing know-how**, through technical support and educational services on how to select the most appropriate protective solution.

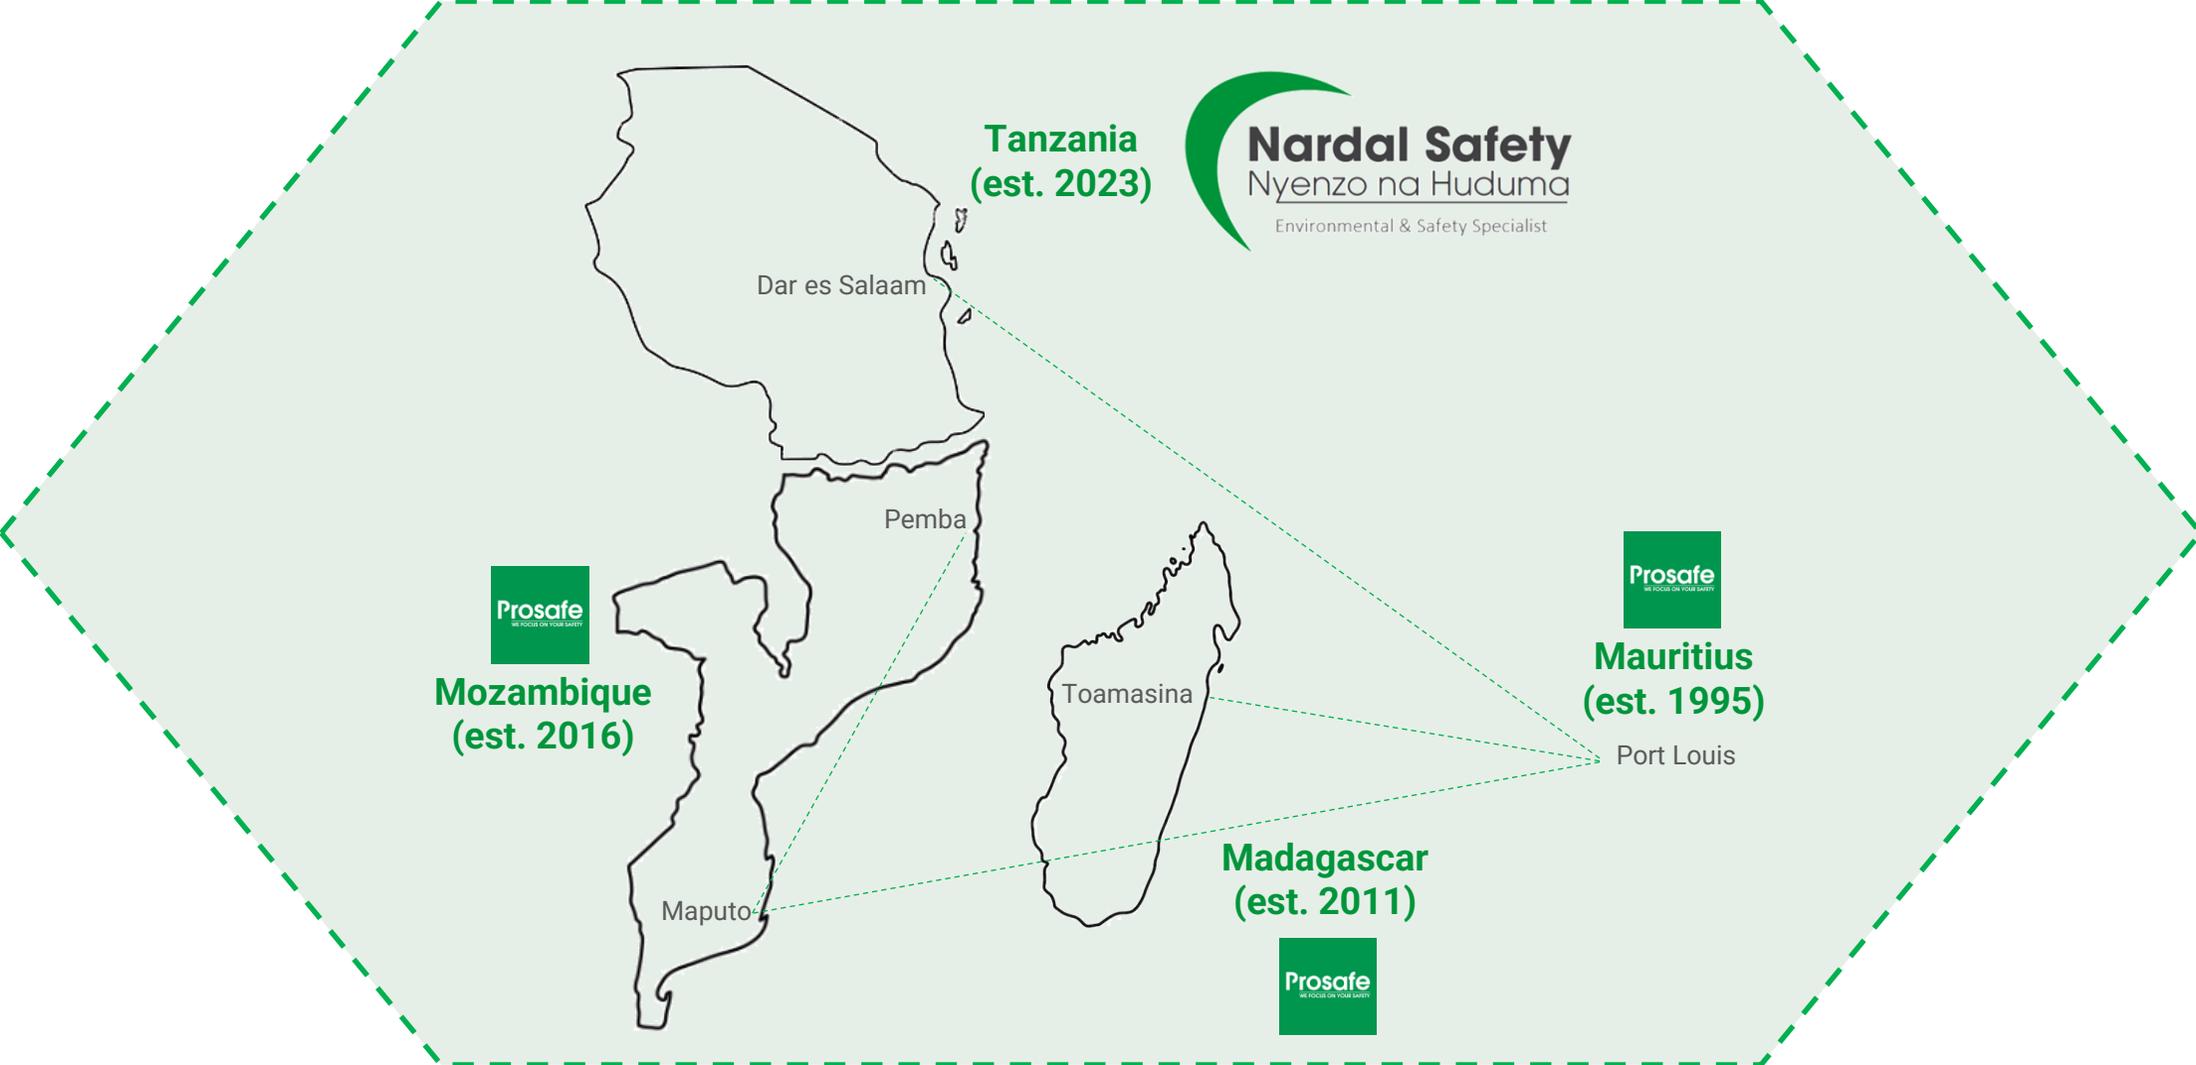

GROUP ACHIEVEMENTS

- A private company that has been in operation for now **30** years.
- **40** employees in 4 countries: a company contributing to employment opportunities.
- Continuous growth reaching USD **+5** million in 2022.
- **1,200** customers across the region.
- More than **1,500** referenced products.
- Over **15,000** portable gas detectors sold.
- **ZERO** accident on contractual projects.
- The very **1st** safety provider for the Mozambican major LNG project (ENI-Exxon JV).

THE AREA WE SERVE

MISSION, VISION, VALUES

MISSION

- Going above and beyond by assisting our clients in protecting their people, their neighbour community, and their environment.

VISION

- To be the leading provider of premium occupational hygiene, health, safety and environmental equipment, instruments, and consulting services in Tanzania.

PRODUCT LINE

NARDAL SAFETY offers a wide selection of OHSE equipment that is fully compatible with all of our clients' needs. The complete range includes the most basic safety devices to highly specialized custom solutions, providing quality and accurate products. Our solutions encompass, but are not limited to:

GAS DETECTION

BW MicroClip Series

Features:
World's most popular multi-gas portable detector, delivering long runtime and reliability; small size, low cost and the easiest user experience.

BW Max XT II

Features:
Reliably monitors up to four hazards and combines straightforward one-button operation with our robust, motorized pump for intelligent, remote sampling, ideal for confined spaces.

MultiRAE Lite

Features:
This multi-gas monitor provides versatile, customizable detection and monitoring of up to 6 gases. It is available in both pumped and diffused air models.

Ventis MX4

Features:

- 4-gas monitor designed to be rugged yet lightweight and easy to wear.
- Available in diffusion or can be used with a slide-on pump.

Ventis Pro5

Features:

- 5-gas monitor designed to be rugged yet lightweight and easy to wear.
- Available in diffusion or can be used with a slide-on pump.

Alcohol Tester Alcoscan

Features:
State of the art high speed testing breathalyzer. It is the instrument of choice for entry point security screening.

PRODUCT LINE

MONITORING INSTRUMENTS

Sound Level Meters & Noise Dosimeters

Features:

- Ideal for industrial & environmental noise assessment.
- Laeq, Ln values, LMax and Lmin.
- Easy to use, measures all parameters simultaneously.
- Class 1 or Class 2 model.
- VoiceTag audio notes and audio recording.
- Available with tonal noise detection, 1:1 octaves or 1:3 octaves, etc.

Personal Air Sampling Pumps

Features:

- The VAPex/Apex2 range of sampling pumps has class beating performance and all models are Intrinsically Safe for use in flammable atmospheres.
- Get connected with the Airwave mobile software and easily send data directly to your laptop (Bluetooth).
- The use of Flow Detective facilitates pre and post calibration..

Human Vibration Monitors

Features:

- Make all the measurements necessary for human vibration risk assessment.
- The HAVex Tri-Axial Hand-Arm Vibration Meter has been specifically designed for hand-arm vibration exposure measurements.
- The Triax offers whole-body vibration measurement capabilities.

Dust Monitors

Features:

- Single and multi-channel, data-logging, laser photometer for real-time aerosol readings.
- Portable design allows you to measure dust, fumes, mists and smoke and is suitable for engineering control evaluations.
- Measure size-segregated mass fraction concentrations corresponding to PM1, PM2.5, respirable, PM10 and PM Total size fractions.

PRODUCT LINE

MONITORING INSTRUMENTS

QUESTemp° Heat Stress Monitors

Features:

- Utilizes WBGT sensing technology; the standard for heat stress management.
- Dry bulb, wet bulb, and globe temperature.
- Waterless wet bulb sensor available.
- WBGT (indoor/outdoor index).
- Heat index (humidex).

Environmental Monitoring Stations

Features:

- Guardian2 is designed to help you remain compliant with site emission levels, using remote monitoring and reporting of noise, dust, ground vibration and VOCs.
- Powered by AC, solar or battery, the Guardian2 is ideal for any location.

Air Velocity & IAQ Meters

Features:

- Simple to operate.
- Measurement range: 0-30 m/s.
- Simultaneously measure temperature and velocity.
- Displays up to three measurements simultaneously.
- Calculates volumetric flow and actual/standard velocity.

Ground Vibration Monitors

Features:

- Build-in features.
- Flexible data retrieval
- Time-synchronized sensors
- Advanced geophone functionality
- Sensor calibration
- Fail-safe keypad
- Rugged and Reliable

PRODUCT LINE

RESPIRATORY PROTECTION

Respirator Fit Tester PortaCount 804X

Features:

- Quantitative respirator fit tester that supports respiratory protection programs throughout the entire fit test process; from training and mask selection through compliance.
- Provides a consistent and objective testing experience across all respirator types, including all N95 filtering facepieces.

SCBA Spiromatic 90U

Features:

- Norms: PPE 2016/425, EN137 Type 2, EN 144.
- Open back plate for good ventilation and low weight.
- Easy to handle and adjustable cylinder strap.
- Carrying handle integrated in backplate.
- Well-proven and robust pneumatics.
- Mask and breathing valve in a compact design.
- Material: Kevlar webbing, heat resistant polymer.

Half Mask 4000 Series

Features:

- Bayonet connection.
- Can be disassembled in less than a minute making cleaning and maintenance much easier.
- Quick attachment/release system and sliding elastics, which allow you to remove and lower the half mask without removing the head harness.
- Material: Thermoplastic (R), Silicone (S).

Full Face Mask 5000 Series

Features:

- Bayonet connection.
- Redesigned to better fit the facial profile and is easily replaceable.
- Non-deformable.
- An aluminum layer, inside the breathing unit of the device, enables the transmission of vocal sound.
- Material: Thermoplastic (5600), Silicone (5700).

PRODUCT LINE

FALL PREVENTION AND CONFINED SPACE

Customized Horizontal and Vertical Lifelines

Features:

- Norms: EN-795-C 2012.
- Integrated shock absorber.
- Integrated drop and tension indicator.
- Carriage body.
- Installation service available.

Confined Space Tripod Rescue System

Features:

- Norms: EN 795:2012 Type B, ATEX 2014/34/EU.
- Auxiliary eye bolts (2) as attachment points.
- Pre-installed universal mounting attachments.
- Steel support-shoes with rubber sole.
- Material of cast head and legs: Aluminium alloy.
- Height: 2,13m (7ft) / 3.05m (10ft).

Full Body Harness & Lanyard

Features:

- Norms: EN 361:2002, EN 358:2018, EN 355:2002.
- Dorsal and sternal D-Ring.
- Adjustable shoulder and thigh straps.
- Work positioning belt.

Self Retracting Lifeline (SRL) - Block

Features:

- Norms: EN360:2002, ATEX 2014/34/EU.
- Polymer casing.
- Galvanized and stainless-steel wire rope available.
- Length: 2m to 30m.

Beam Anchor

Features:

- Norms: EN795:2012 Type B, ATEX Directive 2014/34/EU.
- Width ranges: 75mm to 340mm.

PRODUCT LINE

PERSONAL PROTECTIVE EQUIPMENT

Head Protection

Features:

- Norms: EN 97, EN 12492, EN 50365.
- Ratchet type adjustment.
- Optimum shock absorption.
- Ventilated slots (optional).
- Chinstrap.

Eye & Face Protection

Features:

- Norms: EN 166, EN 170.
- Adjustable temple length.
- Anti-fog lens.
- Scratch resistant lens.
- Clear, Grey, amber.
- Prescription lens inner.

Hearing Protection

Features:

- EN 352-1 -2 -3
- Protection against long term exposure to medium noise levels.
- SNR: 27-37dB

Hand Protection

Features:

- EN 388, EN 407, EN 374-1
- Mechanical gloves.
- Cut resistant gloves.
- Welding gloves.
- Chemical resistant gloves.

Protective Clothing

Features:

- Reflective shirt and trousers.
- Anti-static shirt and trousers.
- Flame retardant and acid-resistant fabric.
- Reflective vests.
- Raincoat.

Safety Footwear

Features:

- S3 Safety Shoes.
- Gumboots.
- Firefighter boots.
- Anti-static.
- Oil-resistant slip-proof sole.

PRODUCT LINE

MISCELLANEOUS PRODUCTS

Master Lock Lockout/Tagout & Solutions

As the world's largest padlock manufacturer, Master Lock offers a wide range of security solutions, including padlocks, lockout hasps & cables, electrical lockout devices, mechanical lockout devices, lockout tagout kits, lockout stations, boxes and cabinets, lockout tagout identification labels, etc.

Airstar Lighting Balloons – Sirocco Range

Thanks to our lighting balloons dedicated to Safety lighting, it is possible to light up an area of 22,500 m² in just two minutes! Using Sirocco lighting balloons is the promise of diffused and homogeneous 360 ° light, without shadows and glare free. Of all sizes and powers, Airstar provides a lighting solution that enables to work efficiently in a safe environment and helps to prevent accidents.

Headlamps

At Petzl, we've been innovating hands-free lighting for over 50 years, providing our customers with headlamps that deliver the highest performance.

Zoll Defibrillators

All Zoll AEDs support AHA and ERC guidelines for high-quality CPR. AED Plus sets the benchmark for design, dependability, durability, and performance.

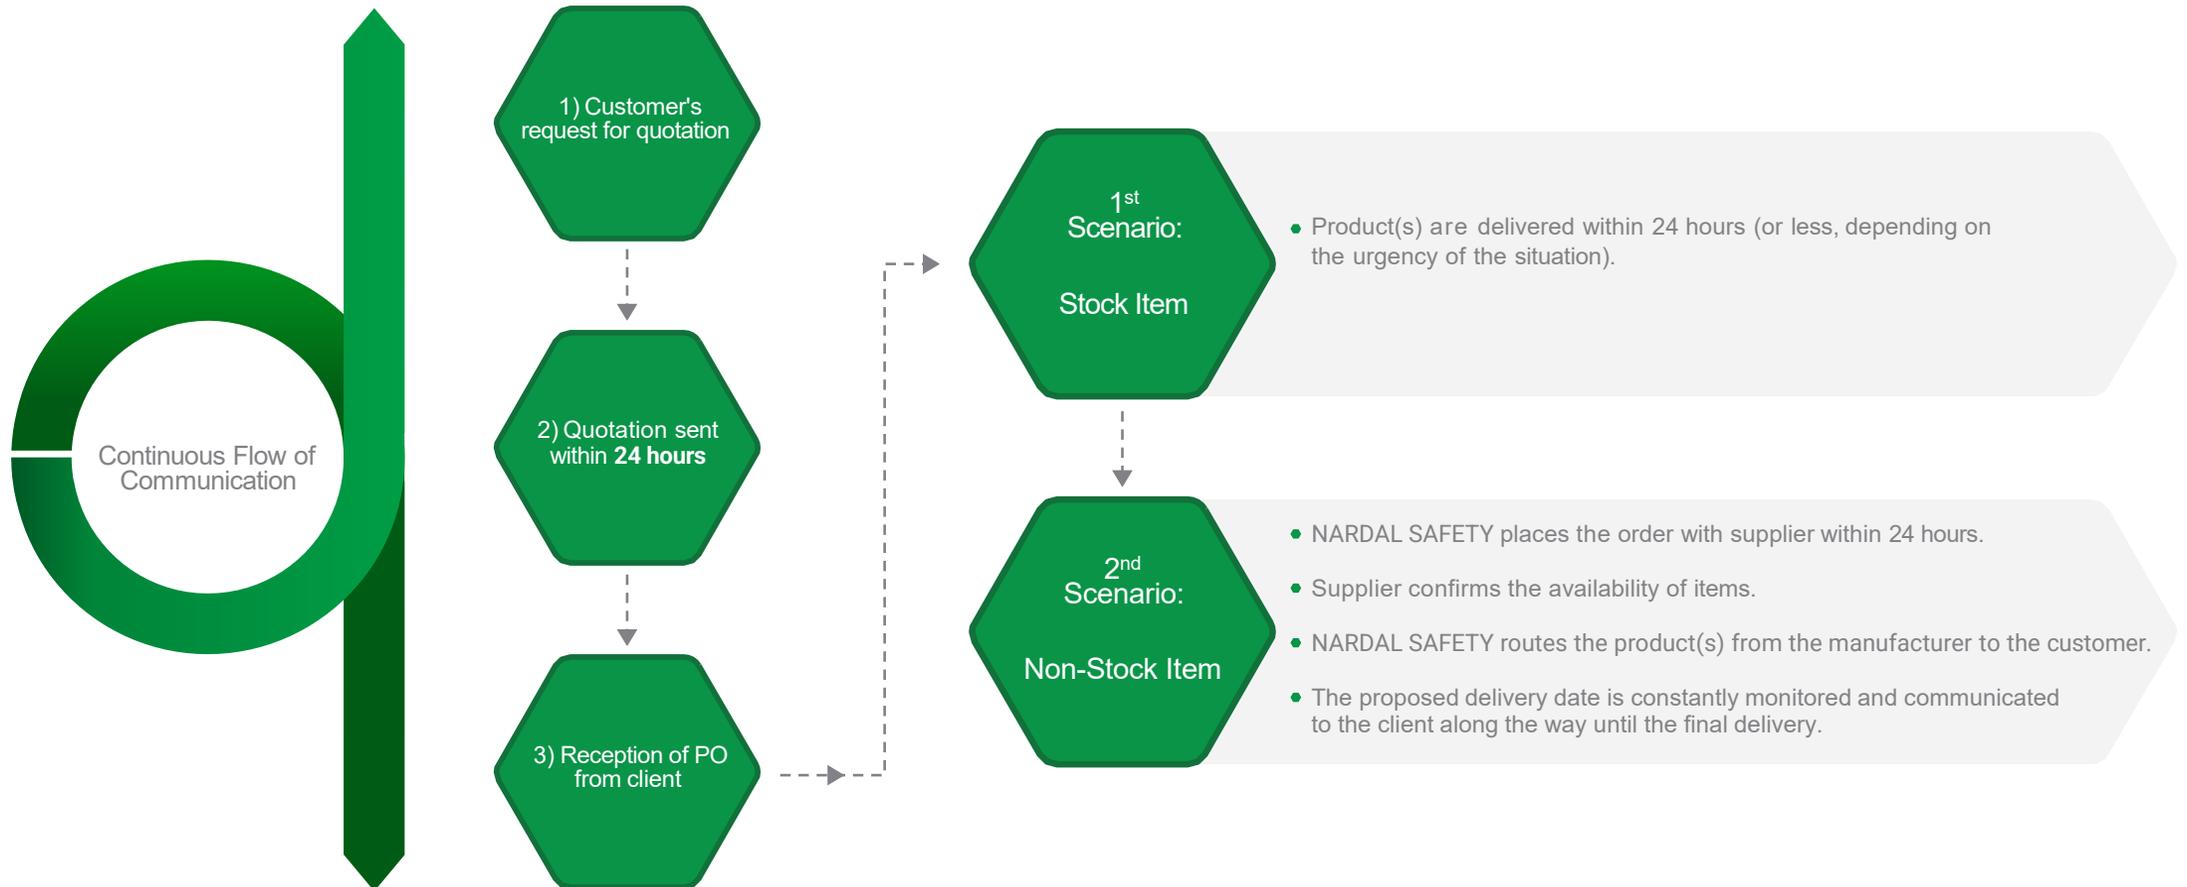

Fire Prevention

We supply fire extinguishers, fire blankets, and comprehensive fire prevention equipment to protect people and assets.

ORDER LIFE CYCLE AND PROCESS

We ship across the Indian Ocean region and East Africa countries, with a promise to deliver products on time. Our services at NARDAL SAFETY are flexible and adaptable to meet the needs of all our clients, as we are aware that OHSE equipment are crucial products.

TECHNICAL SERVICE CENTER

We have qualified and certified technical staff who can perform maintenance and calibration on gas detectors and breathalyzers. We can also assist you with the maintenance and repair of TSI and Casella instruments.

- Technical training and support on all supplied products.
- Commission & installation of technical products.
- Performing calibration & maintenance of technical products (e.g., SCBA, gas detectors, alcohol testers, etc.).
- Door-to-door service delivery – we organise deliveries to all our clients across the region.

Our testing equipment enables us to provide appropriate service and maintenance.

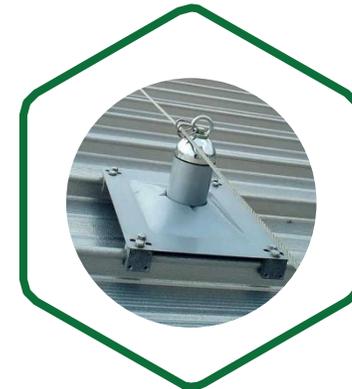

Gas Detector Maintenance and Calibration

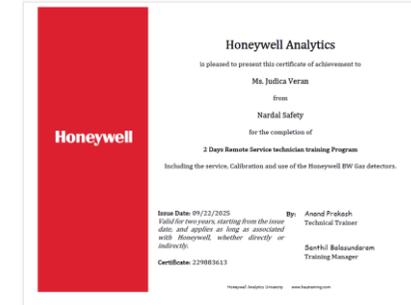

SCBA Test Bench

Alcohol Tester Maintenance and Calibration

Horizontal and Vertical Lifeline Installation and Inspection

CALITRAK – EQUIPMENT MANAGEMENT SYSTEM

CALITRAK™ Digital Platform is designed for small to enterprise-sized organizations looking to implement a sustainable, strategic safety equipment maintenance transformation.

Among all the benefits it can provide, it helps organizations demonstrate full compliance with **ISO 45001** (section 9.1 Monitoring, Measurement, Analysis and Evaluation).

- **Documentation**

Provides you with one-click access to key documents related to your equipment (e.g., user manual, data sheet, certificate of compliance, checklist template, etc.).

- **Fleet Management**

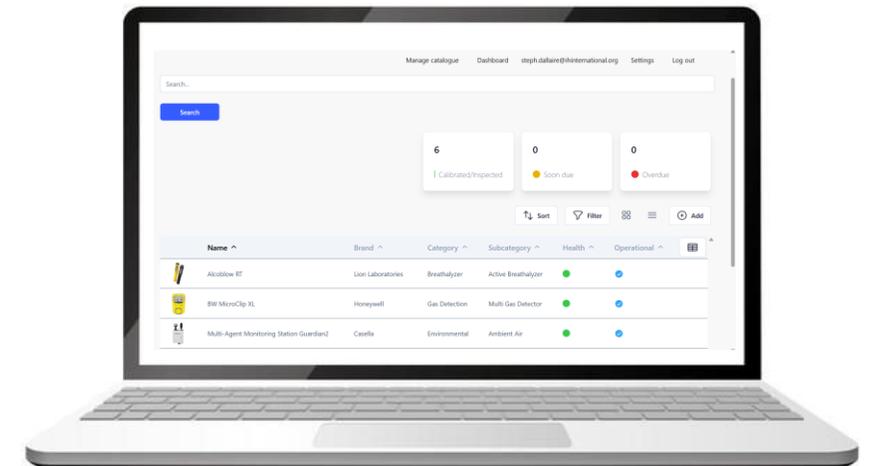

Let you allocate equipment to a specific user and/or department. It displays the number of equipment allocated to your organization, department, and user.

- **Maintenance Tracking**

Allows seeing all in-progress maintenance activities. It gives you on-screen calibration reminder alerts prior to the due date and warning alerts on and after the due date.

- **Maintenance Records**

Used to record asset maintenance activities. It allows you to track maintenance tasks performed (e.g., calibration certificates, maintenance reports, inspection checklists, etc.).

TOGETHER, LET'S PURSUE EXCELLENCE AND ENSURE EVERY WORKER RETURNS HOME SAFE AND WELL

For more than 30 years, your health and safety is our top priority. Our safety solutions offers a rigorous turnkey service allowing you to control your occupational risks and meet your needs, whatever they may be.

The Nardal Safety Difference

- Take full advantage of our team of certified specialists from a variety of manufacturers. Our competent personnel inspects your systems and equipment according to the highest standards and designs custom solutions to meet your needs.
- Benefit from our exceptional customer service, which focuses on respecting people, deadlines and budgets, and on our outstanding ability to solve complex problems that others have not been able to solve.
- Take advantage of our recognized experience in several sectors of activity: mining and metals, construction, food, pharmaceuticals, oil & gas, transportation, public and Para public sectors, petrochemical, manufacturing.

Training Programs

Our certified specialists will help you get started right away with a training program that fits your needs. Our OHSE training programs combine practical and theoretical approaches.

Consulting Services

Our broad capabilities, combined with our great understanding of local cultures, regulatory practices and emerging global issues, trends and techniques, provide clients with an all-in-one EHS solution.

GET CERTIFIED, BE COMPLIANT, AND KEEP YOUR TEAM SAFE.

OHSE Training Courses

- Training from Nardal Safety helps you maximise the use of every piece of equipment
- Certified specialists provide tailored training programs to get you started quickly.
- Health and safety courses combine practical and theoretical learning for full team competency.
- Mentoring and coaching develop technicians' skills in occupational exposure assessments, noise surveys, noise mapping and modelling, gas detection, and more.
- Training follows recognised industry best practices and standards
- Our training portfolio includes essential topics such as respiratory protection, working at height, confined space entry, and other critical safety disciplines.

Book a Training Today!

OHTA Approved Occupational Hygiene Training

To further support our clients in building strong occupational health and safety programs, Nardal Safety offers occupational hygiene training delivered by an OHTA-approved trainer with a strong focus on real-world application and can be tailored to your operational environment.

- OHTA201 – Basic Principles in Occupational Hygiene
- OHTA501 – Measurement of Hazardous Substances
- OHTA502 – Thermal Environment
- OHTA503 – Noise Measurement and its Effects
- OHTA504 – Asbestos and Other Fibres
- OHTA505 – Control of Hazardous Substances
- OHTA506 – Ergonomics Essentials
- OHTA507 – Health Effects of Hazardous Substances

OHSE CONSULTING SERVICES

Entrust your Workplace's OHSE to Our Experts

- Our professionals and associates have the necessary background knowledges, and expertise to develop and carry out monitoring and assessment for every aspect of environment and occupational hygiene.
- Nardal Safety works with a pool of experts specializing in various fields who can clearly identify the situation and apply innovative solutions.
- Our broad capabilities, combined with our great understanding of local cultures, regulatory practices and emerging global issues, trends and techniques, provide clients with an all-in-one EHS solution.
- We put our expertise to work for you! Whether it's identifying risks or controlling them, our team has the answers to your questions.

Environmental Monitoring

- Ambient Air Monitoring
- Stationary Source Emissions Testing
- Continuous Emission Monitoring System
- Atmospheric Dispersion Modelling
- Environmental Noise Assessment
- Carbon accounting (GHG Inventory)
- Water and sediment monitoring
- Vibration Monitoring

Occupational Hygiene

- Occupational exposure assessment
- Hazardous materials management plans
- Noise monitoring & mapping
- Cleanrooms and associated controlled environments
- Heat stress management
- Indoor environmental quality
- Design of local exhaust ventilation

Workplace Safety

- H&S Management System
- H&S Committee Implementation
- Worksite Compliance Inspections
- Risk Assessment & Job Safety Analysis
- Permit System & Lockout/Tagout
- Confined Spaces Management
- Working at Height & Fall Prevention
- Machine Safety & Safeguarding
